

## **Experiment – 10**

### **Application to change font, color and display Toast message**

#### **AIM:**

*To develop an Android application that allows the user to change the font style and color of text displayed on the screen and show a Toast message when a button is pressed.*

#### **ALGORITHM:**

##### **1. Initialize the Application:**

- *Create a new project in Android Studio.*
- *Create MainActivity for the application.*

##### **2. Design User Interface:**

- *Add a TextView to display text.*
- *Add Buttons to change font and color.*

##### **3. Declare Variables:**

- *Declare TextView and Button variables.*
- *Define variables for font and color.*

##### **4. Set Event Listeners:**

- *Attach OnClickListener to buttons.*

##### **5. Change Font:**

- *Use setTypeface() to apply font style.*

##### **6. Change Color:**

- *Use setTextColor() to change text color.*

##### **7. Display Toast:**

- *Show Toast message when button is clicked.*

## 8. End Process:

- *Display updated text with new font and color.*

### CODE:

#### activity\_main.xml

```
<?xml version="1.0" encoding="utf-8"?>

<LinearLayout
    android:id="@+id/main"
    xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:gravity="center"
    android:orientation="vertical">

    <TextView
        android:id="@+id/textView"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Hello World!"
        android:textSize="24sp"
        android:textColor="#000000"
        android:padding="16dp"/>

    <Button
        android:id="@+id/btnColor"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Change Color"
        android:layout_marginTop="20dp"/>

    <Button
        android:id="@+id/btnFont"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Change Font"
        android:layout_marginTop="10dp"/>

</LinearLayout>
```

#### MainActivity.java

```
package com.example.textcolorchanger;
```

```

import android.graphics.Color;
import android.graphics.Typeface;
import android.os.Bundle;
import android.widget.Button;
import android.widget.TextView;
import android.widget.Toast;

import androidx.appcompat.app.AppCompatActivity;
import androidx.core.content.res.ResourcesCompat;

public class MainActivity extends AppCompatActivity {

    TextView textView;
    Button btnColor, btnFont;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        textView = findViewById(R.id.textView);
        btnColor = findViewById(R.id.btnColor);
        btnFont = findViewById(R.id.btnFont);

        btnColor.setOnClickListener(v -> {
            textView.setTextColor(Color.RED);
            Toast.makeText(this, "Color Changed!", Toast.LENGTH_SHORT).show();
        });

        btnFont.setOnClickListener(v -> {
            try {
                Typeface typeface = ResourcesCompat.getFont(this, R.font.myfont);
                if (typeface != null) {
                    textView.setTypeface(typeface);
                    Toast.makeText(this, "Font Changed!", Toast.LENGTH_SHORT).show();
                } else {
                    Toast.makeText(this, "Font not found!", Toast.LENGTH_SHORT).show();
                }
            } catch (Exception e) {
                Toast.makeText(this, "Error loading font", Toast.LENGTH_SHORT).show();
            }
        });
    }
}

```

**OUTPUT:**

## **RESULT:**

*An Android application was successfully developed to change the font and color of text and display a Toast message when a button is pressed.*
